

DISCLAIMER STATEMENT FOR STATUS HERDS LISTED ON JOHNE'S WEBSITE

Please notice the following, regarding these Status Level herds in the Michigan Voluntary Johne's Disease Control Program:

1 – Listing as “Status Level” herds, on this site or elsewhere, is not a guarantee of Johne's-free cattle. No current diagnostic test can guarantee that cattle are not infected with Johne's Disease. The buyer alone retains full liability for the health status of cattle purchased. These “Status Level” herds have undergone differing levels of testing, with all-negative results.

2 – Status Levels range from 1 to 4, with 4 being the herd that has undergone the highest level of testing for the most years with negative results.

The following herds have allowed this information to be published on this website (see next page):
